

PRESS RELEASE

Robocom Systems International Announces New Products at Rendezvous 2007

Customers Gather with Robocom Employees, Strategic Partners and Industry Leaders to Discuss the Latest Products and Innovations

Massapequa, February 13, 2007 - Robocom Systems International, a Global provider of Supply Chain Execution Software today announced the successful completion of Rendezvous 2007, its User Conference last month in San Antonio, TX. Held in partnership with Revere Inc., another Avantcé LLC company, the conference was attended by customers from a wide range of industries. Attendees were able to learn about enhancements to RIMS[®], the company's flagship product, as well as view new products and attend a networking event to share ideas and solutions.

Robocom's CEO, Aivars Lode, addressed the conference with remarks that emphasized the importance of capitalizing on information already contained in the RIMS[®] solution to maximize the value of existing supply chain operations. Robocom team members discussed new tools that can increase visibility into the supply chains of RIMS[®] users and their trading partners. In addition, attendees were introduced to many new solutions that will enable RIMS[®] users to further improve their supply chain efficiency, including:

- IMMPOWER, an industry-leading, ultra-thin client Enterprise Asset Management (EAM) and Computerized Maintenance Management System (CMMS) application from Revere, which addresses key EAM/CMMS performance areas such as: Asset and Work Management, Purchasing, Materials, and Cost Management.
- Warehouse PLUS and Transport PLUS, two Engineered Labor Standards (ELS) solutions, which will enable Robocom customers to harness the existing RIMS data in order to gain even greater insight and control over the productivity of their workforce.
- STAR, a full-featured Transportation Management System (TMS) solution, which will further reduce transportation-related costs, improve customer service, and increase the timeliness of order fulfillment.
- WebStore, a web front-end, which increases customer satisfaction and minimizes lost sales by providing customers with visibility into RIMS[®] inventory and commitment data.

The conference was well received by RIMS users. "It was exciting to see the new Robocom products. Meeting and seeing how other users are working with RIMS is always interesting. Robocom's interaction with the users is great. Well done!" said Rob Lee, Operations / Process Improvement Manager, Emerson Climate Control.

PRESS RELEASE

Aivars Lode, CEO of Robocom stated "Our users' conference provided an excellent opportunity for our customers to interact, share solutions and learn about exciting new products. The products we introduced are all geared towards helping users leverage their existing investment in their world class WMS by adding in complementary functionality to gain a real competitive advantage."

About Robocom - Robocom has helped companies adapt to changing requirements and achieve supply chain excellence since 1982. Our solutions reduce costs, increase productivity and inventory visibility, and improve customer satisfaction throughout your entire supply chain. Unique to our approach is the high level of personalization our customers achieve without the burdensome cost of customization. Whether your requirements include an RFID enabled Warehouse Management System, Engineered Labor Standards or Event Notification, your project will be delivered on time and on budget.

About Revere - Established in 1981, Revere has over 20 years of experience with Enterprise Asset Management (EAM) and CMMS software implementations worldwide. Revere's focus is to provide software-based EAM solutions and complementary products to companies where asset management is mission-critical and the capital assets are essential to generating revenue. Revere designs its solutions specifically for the needs of industries such as upstream and downstream petroleum, power generation, chemical process, pulp and paper, mining, metals, and transportation.

About Avantcé - Avantcé LLC is a private investment company focused on the Software Industry. Our strategy is to work closely with our portfolio companies' management teams providing access to capital, industry expertise, corporate development and business development assistance. Through capital resources and broad industry networks, we are able to add value to the management team and maximize the shareholder returns.
